

Import & Export Options

With SmartSimple you can import and export data from common applications. Because the type, need and nature of data varies, SmartSimple provides users with multiple methods to get information in and out of the system.

Import Wizard	One-time import only.	
SmartFileRetriever	Export and backup files.	
Autoloader	Provides automated upload/update processes.	
File Sync	Synchronize on-line and off-line folders.	 
MS Office Plug-ins	Synchronize with MS Office.	
Universal Tracking Application™ Data Exchange	Useful for cross-system integration.	 
ObjectSync	Useful for cross-system integration.	 
Reports	Allow an external system to request XML data from SmartSimple.	
Workflows	Dynamically post records to other systems based on triggers.	
API (Application Programming Interface)	Component designed for programmer-level integration, includes Web Services.
